

Hairdryers

Innovation and quality 100% made in Italy

Ceriotti manufactures hairdryers since more than 25 years, entirely in Italy.

Every hairdryer is manufactured in accordance with the most severe regulations and tested to satisfy the highest standards of quality and safety.

Ceriotti is the only company to invest constantly in research and development of new technologies to improve your work.

Moreover, Ceriotti's products are manufactured with respect for your work, to ensure everyday the quality that you need for your work.

Main characteristics:

- Body: made of nylon PA 6.6 that is resistant to high temperatures, doesn't suffer for deformations and has an excellent resistance to shocks.
- Motors: only for professional use, AC or HDC (hybrid-DC), with a minimum of 1000 hours of lifespan, with a maximum speed of 21.000 RPM.
- Airflow: from a minimum of 77 to a maximum of 120 cubic meters/hour.
- Air temperature: between 125 and 137 degrees Celsius.
- Weight: from 360 to 465 grams with perfect balance = less stress for the articulations.
- Safety: hairdryers are equipped with safety thermostats to prevent any possible risk during use.
- Cable: 3 meters anti-twist cable made in Italy and only for professional use.
- Technology: Ceriotti's hairdryers are equipped with exclusive technologies and features: Energy Saving, Easy Click filters, HPS2 Heat Proof Surface, Tryosystem™, Life Tech. All these technologies are developed in our company.
- Made in Italy: all our hairdryers are manufactured in Italy in our factory. We use only components of Italian or European origin, certified for professional use and to last in time.

H

HPS2: the body of the hairdryer doesn't get hot, allowing for a more comfortable use.

C

Easy-Click: a filter that makes cleaning easier, reduces noise and increases the performance.

K

Compressor: a redesigned air-intake improves the overall airflow without stressing the motor, for a better performance.

E

Energy-saving: save energy without compromising performance and results.

L

Life-Tech: a device designed to protect the motor from dirt and extend the life of the hairdryer.

T

Tryosystem: a patented technology that maximizes the performance, protects from falls and simplifies the cleaning process, for a better work and a hairdryer that lasts longer.
